6. The plinth of masonry buildings shall be:—

- (a) not less than 2 feet above the level of the centre of the street or open space on which the front of the building abuts if the ground floor is to be used for human residence or occupation;
- (b) not less than 1 foot above such level in other cases, except ware-houses and stables in which a sloping plinth of 1 foot in the centre to 6 inches in the entrance will be deemed sufficient.

14. No drain for the disposal of rain-water or house-drainage shall be constructed within the thickness of any wall of any building, nor will long projecting spouts (*parnas*) be allowed.

15. All stack-pipes for the disposal of sullage roof drainage shall be of cast iron.

25. No portion of any building in a street in which a Building Line has been fixed by a resolution of the Committee shall be built to project beyond such line.

26. No portion of any building abutting on any street or lane, to which from time to time the Committee may by resolution declare this rule to apply, shall be built within  $7\frac{1}{2}$  feet of what was the centre of such street or lane at the time of the passing of these Bye-Laws, and no portion of any building abutting on any street or lane shall be built within 4 feet of what was the centre of such street or lane at the time of the passing of these Bye-Laws, provided:—

- (3) that in case of re-erection of a building, if the applicant omits to include the wall or the portion abutting the street or lane as aforesaid in his application, it will be in the discretion of the Committee to disallow the re-erection of the building applied for, if it is of opinion that the wall or portion thus abutting has been excluded simply to defeat this Bye-Law;

(Resolution No. 1, Ordinary Meeting, dated 8th August 1916.)

29. Every room in a domestic building which is intended to be used as an inhabited room shall have a superficial floor area of not less than 100 square feet; and no room in any building whether the room is used for residential purposes or otherwise shall be less than 10 feet in height (internal measurement), provided:—

When the width of the street is not less than 8 feet but less than 15 feet, the maximum height excluding the height of the plinth shall be 23 feet.
